

ABOUT

I've rediscovered my passion for software development after spending the better part of five years cultivating a strong work ethic in the cable industry. Currently employed at Case Western Reserve University as a Software Developer, where I develop and maintain multiple .NET Web Applications.

Central State University Computer Science
2011 - 2013
Coursework

EXPERIENCE

Software Developer @ Case Western Reserve University
Jun '19 - PRESENT

Developed and maintained numerous .NET Web Applications that serve both faculty and students while working in a fast-paced, Agile, team environment. Utilized several tools to accomplish tasks, including, but not limited to: HTML, CSS, Javascript, jQuery, C#, and SQL.

TechOps Manager @ US Cable Corporation
Feb '16 - Jan '19

Managed a team of 5-10 Field Technicians that installed Spectrum cable services in residential and commercial buildings. Oversaw and maintained a 67% improvement on weighted performance metrics over the span of three years. Mentored and developed new-hires into competent and successful contributors to the team.

Field Technician @ US Cable Corporation
Jul '13 - Feb '16

Installed television, telephony, and high-speed data services in residential and commercial buildings. Met and exceeded all metric performance requirements, including a 98.7% CSAT score. Guaranteed a fulfilling experience for customers with open communication and prideful craftsmanship.

SKILLS

C#
.NET Framework
.NET Core
SQL
HTML5/CSS3
Javascript/jQuery
React
Restful APIs

PROJECTS

Valorant Discord Bot
.NET Core Console App that acts as a Discord bot. The bot serves as a way for users to join or create private Valorant game lobbies, and tracks individual performance based on match results.

Course Review Web App
MVC web application using the Entity Framework to connect to a database, and ASP.NET Razor to display dynamic pages.

Personal Portfolio
Static webpage that demonstrates frontend design with HTML5, CSS3, and JavaScript.

First Aide Web App
React Web Application that provides simple, easy to access instructions for users in emergency situations. Stores and fetches data via a custom built restful API.
